

Creating a Culture of Continuous Improvement

ALIGNING PEOPLE TO A STRONG SAFETY CULTURE WHILE
PROTECTING PROFITS THROUGH THE REDUCTION OF LOSS

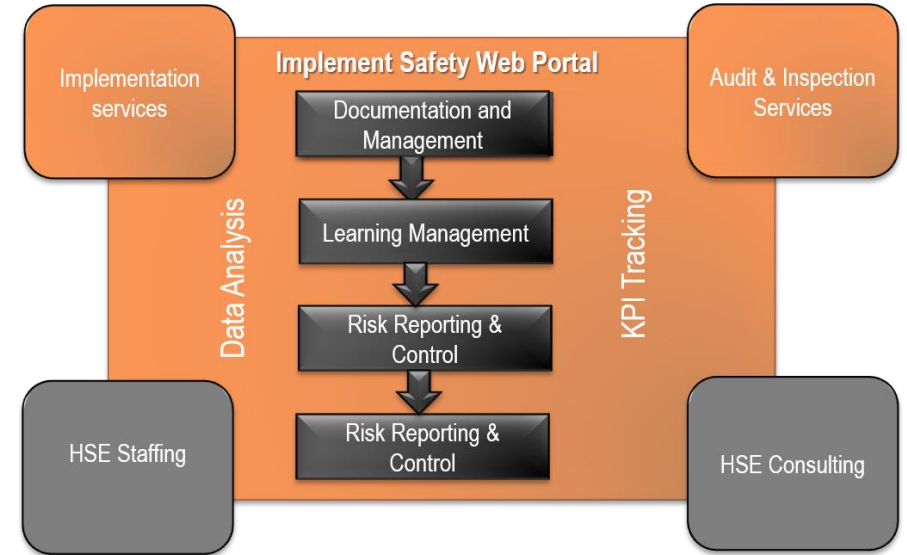

Our Mission

PROTECTING, PEOPLE, PROPERTY AND PROFITS

Implement Safety is dedicated to provide world class Health, Safety and Environmental management services, in order to create a sustainable culture of continuous improvement and operational excellence for our customers.

Implement Safety provides a complete enterprise solution to improve performance of small to mid-size businesses, relating to compliance, risk and mitigation practices, while enhancing workers safety and protecting profits through the reduction of losses.

The Implement Safety Platform Combines a total HSE Management System, with the technology need to provide real-time access to your employees, collect the information need to **measure performance against expectations, and support the company culture**. In addition, the system will enable you to use business intelligence reports to trend your operational risks, employee behaviors, training, and compliance to make more effective decisions, **while aligning your teams to single process**.

Paul Able is the Owner and Principal Consultant for Implement Safety, LLC. Paul was formerly Vice President of Quality, Health, Safety and Environment (QHSE) and one of the founders of RockPile Energy Services.

Paul has held various executive roles in both small private and large public companies. Paul has over twenty years of management experience in the oil and gas exploration and production, as well as upstream services industries, managing both people and processes. He has a proven track record of influencing all levels of an organization to achieve superior results through a core belief in continuous improvement and critical analysis.

Paul is the co-author of “Developing and Sustaining the Observation Culture”, and was a principal contributor to developing a, globally adopted, behavior based safety process while working for a multinational oilfield services provider. In addition, he was seconded to AP,I post Macondo incident, to assist in the establishment of the Center for Offshore Safety.
